

Neckarwerke [Germany]

Neckarwerke Stuttgart AG, Germany was formed by the merger of the former Utilities Neckarwerke AG (Esslingen) and Technische Werke Stuttgart AG.

In Neckarwerke's load dispatch center, the 380kV, 220kV and 110kV electrical energy networks and the power generation system are monitored and controlled. After the merger of both companies, Stuttgart's high voltage network was integrated into the existing PSIControl system by Neckarwerke.

PSI AG, one of the leading German system integrators and software suppliers in the Utility business awarded Barco with the delivery of the large display wall, comprising 9x4 50" projection modules for displaying the network status.

Ref. no. R599739 November '03
